

EASYDCC COMMAND STATION

UPDATED FOR 2005

Easier To Use

- New keyboard legends and key layout
- Large bright LCD display
- Back light for better visibility in dim rooms
- Contrast adjustment for better visibility
- View-angle adjustment simplifies mounting

Improved Programming Track

- Programs any decoder - guaranteed
- Higher power for stubborn decoders
- Better sensing for out of spec decoders

Improved Design

- Longer life backup battery - up to 2 years
- Flush battery holder
- Socketed software

• Simple, Elegant, Future Proof

The **EASYDCC** Command Station is the heart and brain of your system. Thanks to the powerful, modular architecture only one is needed per layout. Upgrades and enhancements are simple - just plug in a new chip. Many DCC users have upgraded to the **EASYDCC** Command Station and throttle system to enjoy the advantages of the superior design, ease of upgrading, easier operation and better throttles. Please give us a call if you are considering converting to **EASYDCC**. We'll be glad to help.

• 100% Decoder Compatibility Guarantee

The Command Station may be used with any brand or style of decoder. Take advantage of its universal compatibility and mix decoders from different vendors. We guarantee your **EASYDCC** Command Station will program and operate any DCC decoder. While some systems may have difficulty programming decoders, **EASYDCC** has no trouble. Its sophisticated and powerful programming algorithms along with a high current independent programming output makes easy work of the sometimes "cranky" sound decoders. We guarantee it!

• Maintain Your Investment

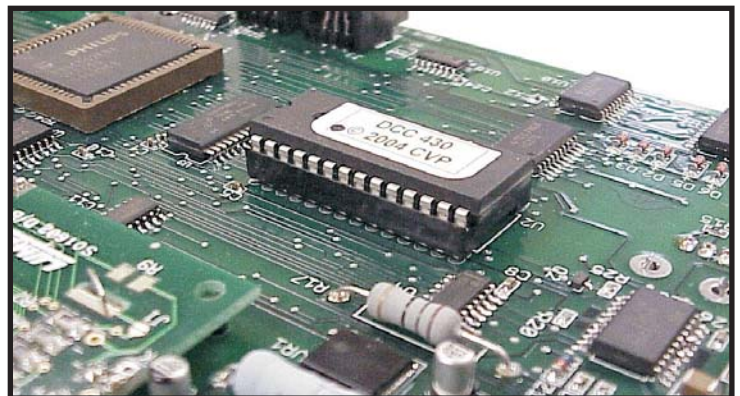

No need to scrap your investment when you are ready to expand. Just add throttles, boosters and decoders as needed. All connections are made with 6 conductor modular telephone-style cables.

Available separately or in one of our popular starter systems.

Outstanding System Features

- ❖ Compatible with ALL DCC decoders
